

The One-Page Boundary Card

✓ WHAT WE DO

We **build and operate** the Agentic OS platform for you. It stays live, your integrations stay connected, and the components we built keep working. That's the deliverable, and we stand behind it.

✗ WHAT WE DON'T DO

We don't **teach, coach, or train** on the products we didn't build — the agent platform, the runtime, the local models, AI agents in general, task-writing, or social / go-to-market strategy. We're your platform operator, not a business or AI-literacy coach.

We're also **not responsible for third-party AI changes** — when a model provider changes behavior or ships a new version, that's outside our control.

CHANGES COST EXTRA

Monthly licensing and support keep what you have running. **Any change, removal, upgrade, or update to the platform is new work** — billed per project, **50% upfront / 50% on delivery**, starting only after a written scope and deposit.

The three things to remember

1

Your website comes first

The platform needs something to run against. Nothing downstream matters until your core sales asset is live.

2

A platform is not a business

This puts you far ahead of starting from scratch — but it doesn't create demand or replace a real business plan. Deciding what's worth doing is still yours.

3

Marketing is not optional

Once you're live, getting heard is one of the most crucial parts. A great product no one hears about doesn't sell itself — agents or not.

YOU ASK US	YOU LEARN ELSEWHERE
"How does this feature work?"	"How do I write a good agent task?"
"Is my integration connected?"	"What should my marketing strategy be?"
"Something looks broken."	"How do I run this business?"

Tip: the chat inside your own dashboard is a live AI conversation — you can ask it to explain itself.
